

OUR WINTER COAT.

Basically, our snowmobiles and motorcycles are the same animal.

They've got the same great 2-cycle engine. (Good? Check Daytona for the last 8 years.)

And the same automatic oil injection. (Outfats - it mixes gas and oil for you. You don't have to mess with it.)

Our snowmobiles even have a third brake. And full-year steering.

Other than looks, the only difference between our snowmobiles and motorcycles is where they go. Not how they go.

We have three different snowmobiles. The SL 338, the SL 396 (shown) and the SL 500 Racing Model.

Below, the 175 Single Enduro-CT-4,
