

Our little one takes you out where the big ones are biting.

OK, you're all set. There's lots of food, plenty of gear, and one more important thing. You brought the Yamaha 90cc HT1-B Enduro*. It's your assurance of coming back with more than just another fish story.

You see, the HT1-B, like all Yamaha Enduros, is at its best on the trail. And, that can mean a lot when you want to get way back in where the fish are big and hungry.

So go ahead. Hit the trail on your Yamaha HT1-B. And don't worry if the going gets rough. This machine can take it. With a double-cradle frame for added strength. Bigger, better Enduro front forks and new 5-step adjustable rear suspension. Dustproof, waterproof brakes. Universal semi-knobby tires. Plus the most dependable 2-cycle engine ever to tackle the back country.

Oh, and just in case that big one does manage to get away, you'll be glad to know that the Yamaha HT1-B is also completely road-worthy. So, you can take a quick, discreet trip into town. There's bound to be a fish market. And, no one will ever know the difference.
