PARTS BOOK

Covering Kawasaki 1015cc models Z1000-A1 & Z1000-A2
with supplement for Z1000-D1 (Z1-R)

INTRODUCTION

The Z1000 was introduced in 1977. It was the natural successor to the legendary Z1-900, working on the principle that "bigger is better." The extra capacity over the 900 resulted in a much more tractable, smoother and quieter engine.

The styling was considered to be rather bland compared to the 900 but Kawasaki wanted to give the Z1000 a classier image whilst still retaining the now familiar 'Z' shape.

In 1978 the Z1-R (Z1000-D1) was introduced as Kawasaki's first mass production 'café racer'. The Z1-R gave riders the option of an already customised Zed. The Z1000 continued in many variations until 1980 when it was replaced with the smaller, but lighter 998cc 'J' model.

KZ1000-B1/B2 LTD SUPPLEMENT

The KZ1000 B Series was basically a standard Z1000 that was taken from the production line, at the Kawasaki plant in Lincoln, Nebraska, and fitted with custom type parts sourced in the USA.

Not officially imported in Europe many LTDs have found their way across the water proving to be quite popular.

This page lists the different parts fitted.
