Z2-750 1973-75 SUPPLEMENT

Originally destined to be a 750, the Z1 was increased in capacity to 903cc after Honda launched its CB750 in 1968. However, the 750cc limit agreed by the big four Japanese motorcycle meant that the Z1 was for export only. The 750 became the Z2 and was aimed mainly at the Japanese home market. If the world was to get the best bike in the shape of the Z1, then Japan was going to get the second best bike - the Z2.

There are few differences between the Z1 and the Z2, the parts listed are illustrated on the corresponding Z1 pages.

KZ900-B1 LTD SUPPLEMENT

In an attempt to lure American riders away from their Harleys without losing their 'street cred' and to take advantage of the increase in Z1 owners fitting after market custom parts to their bikes, Kawasaki introduced the KZ900LTD - the first mass-produced 'custom' motorcycle out of Japan.

Even though the KZ900LTD was assembled in America only 2000 of them were produced being supplied in one colour only - 'Classic Red'. There wasn't a centre stand fitted because the 4-2 exhaust system prevented this. The 900LTD ultimately became the first 'Rice burner with attitude'.

This section covers the different parts fitted to the KZ900-B1 LTD.
