2007 HARLEY-DAVIDSON® PARTS CATALOG

99451-07A

READER COMMENTS

The Harley-Davidson Service Communications Department maintains a continuous effort to improve the quality and usefulness of its publications. To do this effectively, we need user feedback — your critical evaluation of this manual.

Please comment on the completeness, accuracy, organization, usability, and readability of this manual.

Please list the page, item, and part number(s) of any errors you find in this manual.

Please tell us how we can improve this manual.

GENERAL INFORMATION

2007 SPORTSTER MODELS PARTS CATALOG

THIS IS NOT AN ASSEMBLY MANUAL AND SHOULD NOT BE USED AS SUCH

About This Manual

This Parts Catalog has been prepared to make it easier for you to order parts for the 2007 Sportster model motorcycles. You will also find a complete Hardware Listing at the back of the book for your convenience. The numbers shown in the illustrations correspond to the numbers in the "INDEX NO." column in the parts lists. Please consult the illustrations when ordering parts to ensure you receive all the required parts. Take note that the number in parenthesis following the part description is the quantity of that part needed for complete assembly; if there is no number in parenthesis, only one is used. Prices of parts in this catalog are published separately.

The following instructions should be followed carefully when ordering parts:

- The "MODELS" column in the parts lists may include one or more two-character codes that correspond to the V.I.N. model designations. The Sportster models and their respective two-character codes are listed at the bottom of each right-hand page for your reference. If a part fits all Sportster models, "All" will be in the corresponding "MODEL" column.
- Be sure to specify the correct part number for each item. The part numbers appear under the "PART NO." column in the parts lists.
- Orders may be placed via your computer for all parts. Please review your system documentation for details on placing orders electronically. All non-warranty replacement crankcase orders require return of the complete left crankcase half with V.I.N.. All non-warranty replacement frame orders require return of the steering neck with V.I.N.. Non-compliance will result in a fine. See non-warranty frame and crankcase policy or contact your SPOC team for details.
- Parts marked "**RESTRICTED SALE PART**" are limited edition items and can only be ordered as direct replacements. Harley-Davidson may require that certain "**RESTRICTED SALE PART**" items be returned.

To the best knowledge of Harley-Davidson Motor Company, the material contained herein is accurate as of the date this publication was approved for printing. Harley-Davidson Motor Company reserves the right to change specifications, equipment, or designs at any time without notice and without incurring obligation.

Vehicle Identification Number (V.I.N.)

See Figure 1 on the next page. The full 17-digit serial, or V.I.N., is stamped on the right side of the frame backbone at the rear of the steering head. The V.I.N. is also printed on a label on the right side of the down tube.

An abbreviated V.I.N. is stamped on the left side crankcase between the front and rear cylinders.

Sample V.I.N. as it appears on the steering head - **1HD1CV3137K110000**

Sample abbreviated V.I.N. as it appears on the left crankcase - **CV37110000**

Always give the full 17-digit V.I.N. when ordering parts or making any inquiry about your motorcycle.

Figure 1. Typical Harley-Davidson V.I.N.: 2007 Sportster Models

Table 1. Harley-Davidson V.I.N. Breakdown: 2007 Sportster Models

POSITION	DESCRIPTION	POSSIBLE VALUES
1	Market designation	1=Originally manufactured for sale within the United States 5=Originally manufactured for sale outside of the United States
2	Manufacturer	HD=Harley-Davidson
3	Motorcycle type	1=Heavyweight motorcycle
4	Model	See model table
5	Engine type	2=883cc 3=1200cc
6	Introduction date	1=Regular 2=Mid-year 3=California/regular 4=Cosmetic changes 5=California/cosmetic changes 6=California/mid-year
7	V.I.N. check digit	Can be 0-9 or X
8	Model year	7=2007
9	Assembly plant	K=Kansas City, MO U.S.A.
10	Sequential number	Varies

WARNING

A connected battery can cause a spark or motorcycle starting while servicing. Death or serious injury could occur.
 Disconnect negative cable before servicing.
 Keep cable away from terminal while servicing.

15368-01A

WARNING

Motorcycles are different from other vehicles. They operate, steer, handle and brake differently. Unskilled or improper use could result in loss of control, death or serious injury.

- Take a rider training course.
- Read Owner's Manual before riding, adding accessories or servicing.
- Wear a helmet, eye protection and protective clothing.
- Never tow a trailer.

To be removed by customer only.

15370-01A

Battery Removal

WARNING

Sparks can cause battery explosion. Death or serious injury could occur.
 To avoid sparks:
 Disconnect negative battery cable first. Keep cable away from all metal parts.
 Do not allow red-marked positive battery cables to touch metal motorcycle parts with negative cable connected.

- Unscrew nut and remove negative battery cable from crankcase stud (see Figure 1). Keep end of negative battery cable away from all metal parts.
- Unscrew bolt and remove red-marked positive battery cables from battery positive (+) terminal.
- Unscrew bolt and remove battery hold-down strap.
- Lift battery with attached negative cable from battery tray.

Battery Installation

WARNING

Sparks can cause battery explosion. Death or serious injury could occur.
 To avoid sparks:
 Connect red-marked positive battery cables first. Do not allow red-marked positive battery cables to touch metal motorcycle parts with negative cable connected.
 While connecting the red-marked positive battery cables, keep negative cable away from metal parts.

CAUTION

Failure to connect cables to the correct battery terminals could cause damage to the motorcycle electrical system.
 Over-tightening battery terminal bolt could cause damage to battery terminals. Use recommended torque values.

- Place the fully charged battery with attached negative cable into the battery tray.
- Route negative cable through battery tray. Do not connect negative cable yet. Keep negative cable away from metal parts and the crankcase stud until the red-marked positive cables are attached.
- Insert bolt through red-marked positive battery cable and into threaded hole of battery positive (+) terminal. Tighten bolt to 40 in-lbs (4.5 Nm). Do not over tighten.
- Place the negative battery cables onto crankcase stud. Tighten nut to 65 in-lbs (7.3 Nm).

Figure 1
Battery Side View

WARNING

Motorcycles are different from other vehicles. They operate, steer, handle and brake differently. Unskilled or improper use could result in loss of control, death or serious injury.

- Take a rider training course.
- Read Owner's Manual before riding, adding accessories or servicing.
- Wear a helmet, eye protection and protective clothing.
- Never tow a trailer.
