INSTRUCTIONS FOR ORDERING SPARE PARTS.

This Spare Parts List deals with replacement parts for all Models subsequent to 1936. It is most essential that the Engine and Frame Number of the machine is stated. The Engine Number is to be found on the transmission side of the Crankcase, and the Frame Number is stamped on the Head Lug of the Frame, below the steering damper anchor plate. It is always advisable to order parts on a separate sheet, and not to include on the same sheet other matter of a different nature; this facilitates prompt despatch.

It is found in a number of instances that money orders and postal orders are sent in parcels containing patterns; this is inadvisable. We strongly recommend parts as patterns being despatched separately, and a covering letter sent containing the remittance for replacement parts.

RETURNING MACHINES FOR OVERHAULING.

When returning machines or parts for repair or overhaul, these should be sent carriage paid, and with the sender's name and address in full **securely** attached. It is also advisable to state on the tally that a letter has been sent respecting the parts, and giving the date. All easily detached fittings should be removed, such as Lamps, Horns, Tool Bags, Speedometers, etc., these are liable to be lost or damaged in transit, and the Company cannot accept any responsibility for them.

ESTIMATES FOR REPAIRING MACHINES.

We are always prepared to give approximate estimates for the cost of repairs; it is quite impossible to give a firm quotation. Additional parts may be found necessary during the process of repair, unforeseen when preparing an estimate. Should our estimate for repair not be accepted, a charge may be made in accordance with work entailed in dismantling and re-assembling. When we give an estimate for the cost of repairs, and this is curtailed by the owner, we cannot accept any responsibility for the performance of the machine, it is always preferable to accept our estimate in full.

TERMS OF BUSINESS.

Our terms are strictly nett cash with order, or cash against repayment invoice. The exact amount, including postage, must be remitted, or when the cost of the parts required is unknown, a sum likely to cover the cost should be enclosed, if the amount remitted is more than the cost of the parts that are ordered, the balance will either be placed to a credit account or returned at our clients' option. Cheques and Postal Orders should be made payable to "Norton Motors Ltd." and crossed Barclays Bank Ltd. Prices quoted in this list do not include the cost of carriage or fitting. We reserve the right to alter prices or specification of any parts at any time without notice. Where parts are urgently required, remittance may be sent by Telegraphic Money Order, **but it is absolutely essential that the sender fill in his name and address in the space provided on the Post Office Money Order Form.** Unless this is done, the Post Office do not give us the information in the telegram. It is necessary that all orders given by wire or 'phone should be confirmed by letter at the earliest opportunity.

DEPOSIT ACCOUNT.

We strongly recommend riders of our machines to open a deposit account; this can be done by depositing with us not less than £4. This will ensure goods to that value being despatched with the least possible delay. When ordering by 'phone, wire or post, this often avoids great inconvenience, and for the benefit of the depositor, a monthly statement of account is rendered, showing credit balance. Under no circumstances whatever, can parts be despatched without remittance covering same, has been sent, unless a deposit account is opened. Should the machine be disposed of at a later date, we are always prepared to remit any amount that may be remaining.

PARTS BY C.O.D. SYSTEM.

Unless remittance is received with order, parts are despatched by C.O.D. System or against pro-forma invoice at our discretion.
